

## Cresset Aerosols:

- Form release agents
- Concrete spatter protection
- Rust preventative for steel forms used to make concrete products

Cresset aerosol products do not contain CFC's or carcinogens. Release agent aerosols are convenient for applying to edge forms of tilt-up, flat work, etc., and for use on ornamental forms - just a few of the benefits you can get from one or more of Cresset's aerosol spray products. Plus release agent aerosols spray upside down. Also available in 5 and 55 gallon containers and 275 gallon MegaPaks (except Latex).

**Crete-Lease 20-VOC Release Agent** A water based release agent using New Chemistry "Green" technology. Provides a high visual impact CCS 1 or CCS 2 surface finish from any form or formliner. Exceeds all VOC and environmental regulations.

**Crete-Lease 880-VOC Release Agent** An oil based release agent that provides a high visual impact CCS 1 or CCS 2 surface finish from most forms or formliners. Exceeds all VOC regulations.

**Crete-Lease "Latex" Mold Release** A castor oil and alcohol mixture for use with natural rubber latex molds. Helps you produce blemish-free, textured and decorated concrete.

**Spatter-Cote 100 Spatter Protection** A quick, easy, inexpensive way to keep unwanted concrete spatter from building up on forms, vibrating screeds, mixers, scaffolds and equipment.

**Store-Cote RP6 Rust Preventative** Protects steel forms, equipment and tools during storage. Covers 700 square feet per gallon. Reduces or eliminates rust on concrete forms.
