

STAMPCRETE PATINA STAINS

Packaging: 1 Gallon (3.78 liters)
5 Gallon (18.9 liters) Coverage: See Tech Data Sheets

STAMPCRETE Patina Stains produce a translucent variegated finish, including broad drifts in color, sometimes soft in appearance. This variegation is the reason this method of concrete coloration is chosen. STAMPCRETE Patina Stains are not paints or coatings and do not cover up, but rather work in conjunction with the color of the substrate. Patina Stain has durability, strength, and resistance to the effects of weather and traffic.
